

Owner Builder Report

The following matters are covered in your report (which is valid for 6 months):

- The Report will only cover the Owner Builder works (whether requiring a building permit or not). It will list incomplete items & defects identified in works done within the prescribed period (usually last 6½ years).
The report follows a detailed inspection
- The Report does not place any legal obligation on the Owner Builder to rectify defects or complete unfinished work(s)
However an insurer may refuse cover for the project, or for certain defects
- Defects listed in the Report are generally not covered by Builder's Warranty Insurance and are generally not claimable against the Owner Builder
Hence the Report offers protection to the Owner Builder against future claims

The following documents are requested (for viewing only) at the BSS inspection:

- Architectural & Structural Engineer's approved drawings & computations
- Building Permit - Certificate of Occupancy / Final Inspection Notice
- Compliance Certificates for Plumbing, Electrical, Glazing, Waterproofing etc.
- Any Building Notices, Orders, Certificate of Accreditation etc.

Please note that we need to have all these documents available on the day of the inspection.
